

DoRight's "Premium" Poinsettia Series for 2009

The recently introduced genetics of the "Premium" series of Poinsettias is a break-through in plant breeding!

These plants are stronger than any variety currently on the market, and the bracts are very large in size and cover the entire top of the plant with a beautiful variety of colors.

The leaves are a velvety shade of dark green, and this variety has a very long shelf life for the retailer and the homeowner.
