

## DoRight's 2009 Vegetable Descriptions

<b>ARTICHOKE GREEN GLOBE</b>	This artichoke is great for cool, short season climates. Prepare your harvest steamed and it is also very tasty boiled with a splash of olive oil and garlic. Space 2' - 3' apart in the sunniest location in your garden that has rich, well drained soil. A California classic !
<b>BEAN BLUE LAKE POLE</b>	This is a tasty and tender bean. Very dependable and easy to grow. Plant 2'-3' apart in a sunny location. Support with string or trellis.
<b>BEAN BUSH BLUE LAKE</b>	Bush variety. Bean is long and smooth with a sweet and delicate flavor. Great producer over a long season in sunny locations.
<b>BEAN GOLDEN WAX</b>	Totally string less and no staking. This is the low maintenance bean with a high yield. Beans are a golden yellow even when cooked! Quite tender and juicy, perfect fresh or canned.
<b>BEAN HENDERSON BUSH LIMA</b>	This is a buttery baby lima. Smooth and delicate these beans are very yummy. Plants need to be staked but are very easy to grow. Plant when temperatures are warm and not too hot. Harvest beans when they are nice and plump.
<b>BEAN KENTUCKY WONDER POLE</b>	67 days. One of the oldest and most widely used varieties. Bright green 8 inch pods are vey flavorful. Resistant to rust. Climbs freely, produces quickly and bears until frost.
<b>BEAN ROMA II</b>	No stings and no staking and very easy to grow! You will get tons of tender and tasty beans along these vines. Start early and harvest early.
<b>BROCCOLI DICICCIO</b>	This Italian heirloom produces very good quality 3-4" heads with lots of side shoots. A very good cool season variety.
<b>BRUSSEL SPROUT CATSKILL</b>	Give these tasty nuggets a little space in your garden and find out how delicious they are! This selection is a semi-dwarf variety that grows 20"-24" tall. It is very flavorful and will produce a generous crop. Does best in rich well drained soil. Cool season crop.
<b>BEET BULLS BLOOD</b>	Heirloom. 58 Days. Deep burgundy leaves for salad mix. Roots show attractive candy stripe zoning when sliced.
<b>BEET DETROIT DARK RED</b>	60 days. This beet has unbeatable canning and pickling quality. Robust sweet flavor with intense bright crimson color with no white streaks or rings. Tops are rich in vitamins A and C.
<b>CABBAGE COPENHAGEN MARKET</b>	Heirloom. 100 days. One of the largest early varieties. Solid round heads 6-8" across weigh 3-4 lbs. Good keeper.
<b>CABBAGE MAMMOTH RED ROCK</b>	Heirloom. 98 days. Introduced in 1889. Solid round heads are 8" in diameter and weigh 7 pounds. Red throughout, small to medium core. Excellent for cooking, salads, and pickling.
<b>CABBAGE SAVOY PERFECTION</b>	90 days. Savoyed leaves are sweet and mild with crinkled texture. When grown as a late crop, flavor improves after light frost. Great raw in coleslaw, or can be steamed, stir fried, or made into sauerkraut.

<b>CAULIFLOWER SELF BLANCH</b>	71 days. A cool season vegetable. 7 inch heads with excellent leaf protection. Does not need tying especially in fall crops.
<b>CELERY TALL UTAH</b>	A temperate climate celery. Stalks will get 11-12" long. They are dark green and very crisp. Have you ever tried home grown celery? You should give it a try!
<b>COLLARDS GEORGIA</b>	If you can't swallow a vitamin try eating collards instead. Collards are loaded with vitamin A, B1, B2, and C. The leaves of this collard are dark green and it is best to pick when the leaves are young. This is a non-heading variety so the more you pick the more it will grow. Can take some frost and will tolerate heat.
<b>CORN HONEY AND PEARL</b>	AAS Winner. 76 days. Early maturing bicolor super sweet hybrid. Nine inch ears have tight wrapping which reduces corn ear worm infestations. Super sweet corn is bred to contain twice the sugar of regular sweet corn and they retain their sweetness up to 2 weeks longer. They must be isolated from other corn varieties by 200 feet or at least 2 weeks planting time.
<b>CORN JUBILEE</b>	81 days. Glossy yellow kernels with high sugar content and smooth texture. 8 1/2 inch long ears with 16-20 rows.
<b>CORN SILVER PRINCESS</b>	Extra early variety, be the first with corn ready this summer. This is a super sugary sweet white corn with bright luminescent kernels. Yummy and early...you can't beat that!! 2 1/2 weeks earlier than the old standard Silver Queen. Great disease tolerance for better yields.
<b>CUCUMBER ARMENIAN</b>	These light green delicacies have a delicious clean, fresh taste and are burp less. The unusual fruits will be slightly ribbed and spineless when mature. Pick them for best flavor when they are 12 - 15 inches long, but they can reach up to 24 inches in length. Growing the plants up a trellis will reward you with straighter fruit for easier slicing. Plant in your garden area that has moist well drained soil and receives full sun.
<b>CUCUMBER HOMEMADE PICKLES</b>	This special cucumber has been bred for making the best pickles you've ever tasted ! Harvest when they are 1-1/2 inches long for tiny sweets or 5 to 6 inches long for robust dills and spears. They are solid and crisp with superb flavor. Vigorous 5 foot long vines exhibit excellent disease resistance and will give you armloads of fruit. See you at the county fair !
<b>CUCUMBER JAPANESE SUYO</b>	A wonderful long and curvy dark green fruit with non bitter burp less skin. Grow in warm sunny location.
<b>CUCUMBER LEMON</b>	This scrumptious old fashioned yellow cucumber has the nicest sweet, mild flavor. It's attractive bright lemon-yellow round fruit should be picked when they are 2 to 3 inches in diameter. This variety is a favorite of cool season gardeners. It grows into a nice 3 to 4 foot tall semi- bush form that does best with moist well drained soil. Kids will love to grow and eat this pretty little cucumber !
<b>CUCUMBER MARKETMORE SLICING</b>	Great slicing cucumber with dark green skin. Easy to grow and disease resistant. Plant in sun 2-'3' apart.
<b>CUCUMBER TENDERGREEN BURPLESS</b>	Great non bitter, burp less variety. Sweetest flavor when fruit is picked at 5". Plants are resistant to mildew.
<b>EGGPLANT BLACK BEAUTY</b>	Still THE classic home gardener's favorite eggplant. Each plant will give you as many as five enormous fruits. The eggplant skin is a rich glossy blackish purple and the interior is very tender and has great flavor. Remember to plant several for all of your favorite Mediterranean recipes. Position these young plants in full sun and make sure to give them well composted soil.
<b>EGGPLANT FAIRYTALE</b>	Plump and tender this is a great eggplant with a nice creamy flavor. The skin is a pretty purple and white marble. These plants are small only 18-24" and can be very prolific. Pick eggplant when they are 4-5" long. A super veggie for a small garden area.
<b>EGGPLANT JAPANESE MILLIONAIRE</b>	Japanese Millionaire is the most popular selection that you will find in local Asian markets. This plant will give you slender 8 "-12" long deep purple fruit that are very tender and have a mild flavor and are never bitter. Try them in your cooking or pickling.
<b>EGGPLANT LAVENDER TOUCH</b>	Very pretty white cylindrical fruit with a lavender blush, and a mild flavor. Very productive plant. Heat loving vegetable.
<b>EGGPLANT ZEBRA</b>	One of the most attractive eggplants with deep violet and white variegated skin. Fruit is large 6-8" long 4" wide with tender mild flavor.

<b>ENDIVE SALAD KING</b>	95 days. Long curled and deeply cut leaves with dark green blade and pale green midrib. More spreading and very slow bolting in hot weather. Also withstands fall rains and light frost.
<b>GOURDS SMALL WARTED MIX</b>	Great mix of small yellow, orange, green and creamy white gourds with heavily warty skin. Pick and dry indoors. Plants are vigorous and will produce many fun and different gourds.
<b>GOURDS LUNCH LADY LARGE FRUITED MIX</b>	Large wild mix of fun colors and warty skins. Most of these gourds will weigh 5-20 pounds. A great addition to your Harvest decorations.
<b>LETTUCE BLACK SEEDED SIMPSON-HEIRLOOM</b>	An heirloom variety that is still one of the best producing around. The earliest tender leaf lettuce that is good for spring or fall plantings. It quickly produces a large head of crinkly, juicy, light green leaves. Harvest leaves often for a longer salad production season.
<b>LETTUCE GOURMET SALAD BLEND</b>	A special blend of our favorite lettuces in equal proportions for the easiest salad producing garden that you could wish for !
<b>LETTUCE LOLITA</b>	Lettuce is a good cool season crop. Does best in spring or fall. This lettuce is heavily frilled with a pretty burgundy color. Very attractive lettuce, good for salads or as a garnish. Grow in well drained moist soil.
<b>LETTUCE OUTREDEGEOUS</b>	A totally bright red romaine lettuce ! This outstanding variety shows it's solid brilliant red color even with some shade. The leaves are thick, crisp and juicy with sweetness unmatched by other lettuce types. The baby leaves are long with ruffled edges and the mature heads are big, tall, and beautiful with a loose character. Try this fabulous new lettuce in your salad garden !
<b>LETTUCE RED DEER TONGUE</b>	Heirloom. 55 days. A variable strain with dark red to bronze leaves. Some leaves are long and narrow and some are wide and blunt. A butter head with excellent flavor.
<b>LETTUCE RED ROMAINE</b>	Medium sized, deep burgundy leaves adorn this romaine lettuce. Harvest early for pretty, crisp, young red leaves that have a sweet flavor, or let the plants mature into the classic romaine head that is easy to pick and use in salads. Pair with green romaine varieties for a beautiful combination in your garden.
<b>LETTUCE RED SAILS</b>	Red Sails is an AAS award winner and it is an all time favorite ! This loose leaf variety will measure up to 10 inches across and it's medium green, broad leaves are deeply fringed and pleasantly crinkled. The edges of these lettuce leaves have a beautiful burgundy blush that holds in the garden for an extended period after maturity without getting bitter. A heat resistant variety you will surely love.
<b>LETTUCE ROMAINE</b>	An easy to grow garden favorite that has a crisp sweet flavor. This plant will form a loose head with long, dark green 8 to 9 inch leaves. Harvest young leaves as needed for salads or let the plants mature into it's familiar shape. Good heat tolerance.
<b>LETTUCE ROUGE DE HIVER HEIRLOOM</b>	This French heirloom variety name means "Winter Red". A Romaine type lettuce which is popular used when it's leaves are baby sized and will continue to produce for a long season. It is sweet and very attractive. The leaf color varies from green to bronze-red. An elegant addition to your salad bed.
<b>LETTUCE SALAD BOWL RED</b>	Red Salad Bowl is highly regarded for use when it's leaves are baby sized. Radiant burgundy-red, deeply lobed, delicate oak like leaves form a full rosette. It is an early producer and holds its mild flavor for an extended period. This variety grows well in spring, summer and fall.
<b>MELON BANANA</b>	80- 100 days. Heirloom. Introduced in 1888. An unusual smooth creamy yellow skinned melon that is 18 inches long. Flesh is soft and juicy salmon orange color with a strongly sweet flavor like an over ripe banana.
<b>MELON CRENSHAW</b>	This melon has yellow gold skin with pale salmon colored flesh. Extra sweet and juicy with a slight spicy smell. Does best in hot well drained location.
<b>MELON EARLY SILVER LINE</b>	Unique, elongated oriental melon. White, crisp flesh sweet and fragrant. A small delicious gourmet melon rarely found in markets. Yellow skin lined with silvery furrows, so thin it can be peeled like an apple. Harvest 76 days after sowing.
<b>MELON GREEN NUTMEG</b>	83 days. Heirloom. The fruit is large and round, netted with flattened ends, deeply ribbed with a thin ring. Flesh is light green with a spicy flavor that reminds you of nutmeg.

<b>MELON HALES BEST JUMBO</b>	Heirloom variety. Skin is tan with netting, and flesh is bright orange. Rich aromatic flavor. Plants do best in hot and well drained locations.
<b>MELON HEARTS OF GOLD</b>	An almost round 3 -4 pound fruit with an aromatic, sweet scent. Thick deep orange flesh with a small seed cavity. Ripens early.
<b>MELON HONEYDEW GREEN FLESH</b>	Skin is lime green with yellow accents when ripe. Flesh is light green, watery and very sweet. Does best in hot dry locations.
<b>MELON HONEYDEW ORANGE FLESH</b>	Flesh looks like cantaloupe but has a honeydew skin. Flesh is sweet with honeydew flavor. Prefers hot well drained location.
<b>MELON MINNESOTA MIDGET</b>	Cute little miniature 4" melons resemble cantaloupe but the mini version. Great tangy sweet traditional cantaloupe taste. Vines are smaller too...and will only grow 3-4 feet. The perfect melon for small garden areas.
<b>MELON TIGGER</b>	This is a beautiful melon. It is fire red with yellow stripes. Very bright and distinctive, but also very tasty. The flesh is white and very sweet. Great melon for hot areas.
<b>MIZUNA</b>	These elegant dark green leaves have neat saw-toothed edges and a mild yet tangy flavor. Very good in a salad. Can be grown in veggie beds or herb gardens.
<b>MUSTARD RED GIANT</b>	Spicy flavored greens that can be used like spinach. Coppery colored leaves make it a very colorful addition to a salad. Very unique flavor and color. They usually have a very long growing season...remember the more you pick the more it will produce!
<b>OKRA CAJUN DELIGHT</b>	Super prolific plants producing tons of 5" long fruit. Plants grow to 38", and are very adaptive to a wide range of growing climates. This is a tasty okra and a true staple of Cajun cooking.
<b>ONION DEEP PURPLE BUNCHING</b>	The first deep red-purple bunching onion that shows it's beautiful color at any temperature or age. Your plants will have a very nice sweet and spicy flavor and be larger than most other bunching onion. An incredibly striking onion for many uses.
<b>ONION LISBON GREEN BUNCHING</b>	Grow your own green onions for salads, garnishes or as an addition to the appetizer tray.
<b>ONION RED (BURGUNDY)</b>	100 days. Short day variety suitable for southern regions. Produces 4" wide red onions with a mild sweet flavor. Excellent slicing variety.
<b>ONION WHITE SPANISH</b>	Well known mid-season onion. Mild sweet flavor raw, also great sautéed or deep fried. One of the best all-round white onions available. Produces large bulbs with fair storage qualities. Short to intermediate day.
<b>ONION YELLOW SPANISH</b>	Large yellow globe-shaped bulbs with mild flavored creamy white flesh. Allow the thick necks to dry well before harvesting. Short to intermediate day.
<b>PAK CHOI WHITE STEM</b>	45 days. A nonheading leaf type Chinese cabbage that produces large 8-10" long nearly round, smooth glossy green leaves with a snow white stalk. Very cold hardy and produces over a long period of time. Crisp and mild tasting. Great for Oriental cooking.
<b>PEA GREEN ARROW</b>	Very high yielding plants. A sweet garden pea that is tender and about 4" long. Peas grow in pairs at the top of the plant for very easy picking. Plants are resistant to disease. Great cool season veggie.
<b>PEA SNOW OREGON SUGAR POD</b>	If you have a small area for a garden this is the perfect snow pea for you! The vines are small only reaching 24-30" and don't need any staking. They have a delicious sweet taste, and good crisp texture. They are stringless too! Good cool season veggie.

<b>PEA SUGAR SNAP</b>	AAS Winner. 70 days. An outstanding edible pod pea. Superb thick pods are crisp, tender and sugary sweet.
<b>PEANUT VALENCIA SPANISH</b>	
<b>PEPPER ALMA PAPIKA</b>	This is a prolific pepper. The plants will be loaded with a bunch of small round peppers ranging in color from creamy white to orangey red. They are thick walled peppers but have a nice combination of a tangy and sweet flavor. Can be used fresh or as a powder.
<b>PEPPER ANAHEIM</b>	Also known as the New Mexican Chile, this moderately pungent fruit is deep green but turns red at full maturity. These are very smooth peppers which are 7 1/2 inches long and 2 inches wide and are borne on tall productive plants. Excellent used fresh, dried or frozen.
<b>PEPPER ANCHO</b>	Mild; 4 to 6 inches long by 2.5 to 3 inches wide; Ancho/Poblano Type; matures from green to red; called "poblano" when fresh, "ancho" when dried; from Mexico; Uses: Large Stuffing, Mexican Cuisine, Mole, Powder, Roasting, Tall Variety; <i>C.annuum</i> .
<b>PEPPER BETTER BELLE</b>	An even blockier, thicker walled and earlier selection than the original. This vigorous variety will give you large, four lobed sweet peppers which mature from green to a bright red over a long growing season.
<b>PEPPER BLACK HUNGARIAN</b>	Highly ornamental and useful in the kitchen. Green foliage is highlighted by purple veins and beautiful purple flowers. Sturdy plants grow to 30 - 36 inches in height. Produces 3 - 4 inch fruits similar in shape to Jalapenos, but black ripening to red. Mildly hot with good flavor.
<b>PEPPER CARIBBEAN RED HOT</b>	Twice as hot as a regular Habanero. You can also use this pepper green. Be adventurous.
<b>PEPPER CAYENNE LONG THIN</b>	Pencil shaped fruits, often curled and twisted. Red Hot Flavor, dries well. Mature fruit in 75 days.
<b>PEPPER CHILE D'ARBO</b>	A Cayenne type pepper with pointed pods that are 2 to 3 inches long and 3/8 inches wide. They mature to a dark red and are thin fleshed. The Mexican common name is pico de pajar (bird's beak) and cola de rata (rat's tail). They are usually ground into a dry powder for red chile sauces or added whole to soups and stews.
<b>PEPPER CUBANELLE</b>	Considered an Anaheim Pepper substitute. Great for stuffing, roasting, salads, etc. Mild to moderately warm flavor.
<b>PEPPER FLORAL GEM</b>	VERY hot, a long time favorite for home gardeners. When pickled young they are known as "Torrido Peppers"
<b>PEPPER FRESNO CHILE</b>	The California pepper for salsa. A medium sized pepper that is 2 - 3 inches in length and about 1 inch wide. These peppers start green, turn orange and then mature to red. A prolific plant that produces over a long summer season.
<b>PEPPER GOLDEN WONDER</b>	The best stuffing and most popular yellow bell pepper ever. Smooth and glossy fruit are large sized, 4 inches by 3 1/2 inches with that classic blocky shape They ripen to a beautiful golden yellow. A wonderful addition to your sweet pepper collection.
<b>PEPPER HABANERO</b>	This is one of the most intensely hot chile peppers. Unripe fruits are green and they color as they mature. Typically a ripe habanero is 1-2 1/2 inches long.
<b>PEPPER HUNGARIAN YELLOW HOT WAX</b>	Medium hot peppers, especially good for pickling. Canary yellow then bright red at full maturity they reach 6 to 8 inches long and 2 inches wide. Plants are 20 to 24 inches tall.
<b>PEPPER JALAPENO</b>	Best known chile pepper of them all ! Indispensable to Mexican cooking, eaten fresh, roasted and dried. Dark green in color with moderate heat these peppers will be about 3 inches long and 1 1/2 inches wide when mature. Tall plants in the garden with heavy yields that are easy to pick.

<b>PEPPER JIMMY NARDELLO'S</b>	This is the best sweet variety for drying. One of the most productive, disease resistant and most widely adapted sweet peppers around. Fruits are multidimensionally sweet and intensely flavored. Banana shaped fruits are 5-8 inches long, slightly curved and thin walled. Try this fried, it's great !
<b>PEPPER LARGE CHERRY HOT</b>	This large, hot cherry pepper is round and matures from green to bright red. It is popular stuffed with cheese and used as a popper. It is also used for preserving and pickling. Make your own fun party food !
<b>PEPPER MARCONI RED</b>	A mild, sweet flavored pepper with long thin pods that turn deep red when ripe. Highly productive plants.
<b>PEPPER MINIATURE CHOCOLATE BELL</b>	Sweet; 1.5 to 2 inches long by 1 to 1.5 inches wide; Bell Type; matures from green to chocolate brown; pendant pods; from USA; Uses: Small Stuffing. Crisp sweet taste. Peppers do best in well drained warm locations.
<b>PEPPER MINIATURE RED BELL</b>	Sweet; 1.5 to 2 inches long by 1 to 1.5 inches wide; Bell Type; matures from green to red; pendant pods; from USA; Uses: Small Stuffing; <i>C.annuum</i> . Crisp sweet taste. Peppers do best in well drained warm locations.
<b>PEPPER MINIATURE YELLOW BELL</b>	Sweet; 1.5 to 2 inches long by 1 to 1.5 inches wide; Bell Type; matures from green to yellow; pendant pods; from USA; Uses: Small Stuffing; <i>C.annuum</i> . Crisp sweet taste. Peppers do best in well drained warm locations.
<b>PEPPER MULATO ISLENO</b>	Ancho type pepper that turns a warm chocolate brown at maturity. Mildly hot distinctive flavor. Grow in warm well drained areas.
<b>PEPPER PASILLA BAJIO</b>	Also known as 'chile negro' this pepper grows 8-10 inches long. It is mild, mainly used for its rich smoky flavor in sauces. 80 days to mature.
<b>PEPPER PEPPERONCINI</b>	This light green medium sized pepper is great for pickling. Best when picked young. Needs well drained soil. Plant in sunny locations.
<b>PEPPER PIMENTO</b>	Large heart shaped fruit. Often canned and pickled. Mild sweet flavor. 95-100 days.
<b>PEPPER POBLANO</b>	The most popular pepper in Mexican cooking. Great smoky mild taste. When fresh it is called Poblano, and dried it is called Ancho pepper.
<b>PEPPER PURPLE BEAUTY</b>	A modern exotic that is found on shelves in gourmet sections of vegetable specialty markets. It is a sweet bell pepper with a beautiful deep purple color that can be easily grown alongside of your red and green bells to give you a beautiful rainbow of peppers. The fruit have thick walls which make them perfect for slicing. It makes a compact plant in the garden.
<b>PEPPER RED BELL</b>	Plant this beautiful red bell pepper for it's sweet flavor and incredible color. Fruit will start green and mature to a rich red. These peppers can be used fresh, roasted or baked. Sweet peppers are always a welcome addition to any meal.
<b>PEPPER SANTA FE GRANDE</b>	A garden standard from 1965, ripens from yellow to orange to red. Great for pickling, salsa and canning.
<b>PEPPER SERRANO TAMPIQUENO</b>	Distinctive hot flavor excellent for cooking and making sauce. Large plants 2'-3' need well drained soil, and sunny location.
<b>PEPPER SHEEPNOSE PIMENTO</b>	An Ohio heirloom. Cheese peppers are 3" long and 4" wide. Extremely flavorful, sweet thick juicy flesh. Good for canning. 70-80 days.
<b>PEPPER SWEET BANANA</b>	Pungent flavor, but not hot. Bright red when ripe, slender pepper, 6-7 inches long. 58 days to mature.

<b>PEPPER SWEET CHERRY</b>	Grow your own immensely popular sweet cherry peppers ! These are the standard 2 inch peppers that are uniformly rounded in shape. A superb yielding, vigorous plant that gives you load after load of sweet fruit. Great for canning and found on all party trays.
<b>PEPPER TEQUILA SUNRISE</b>	sweet; 3 to 3.5 inches long by 0.75 to 1 inches wide; matures from green to golden orange; thin-fleshed, pendant fruits; Uses: Compact; <i>C.annuum</i> .
<b>PEPPER THAI HOT CULINARY</b>	Caution! This is a hot, hot pepper. Long and thin, these peppers usually grow to 3" long and are a fiery red when ripe. Plants are compact to 24" which makes picking very easy. Can be used fresh or dried...but remember it is hotter than a jalapeno pepper!
<b>PUMPKIN BIG MAX</b>	Large rambling plant produces bright yellow orange pumpkins. Average weight is 50-70 lbs., but can grow larger.
<b>PUMPKIN CASPER</b>	White skinned ornamental pumpkin with bright orange flesh. Very sweet flavor, and is good for cooking. Average size of pumpkin is 10-12 lbs.
<b>PUMPKIN CINDERELLA</b>	This is a great novelty pumpkin. Usually grown for decoration, but can make a tasty pie. Deeply ribbed orange-ish red pumpkin that looks like it has been flattened slightly. A nice unique shape, and some think it resembles the pumpkin coach from Cinderella. Your kids will love it!
<b>PUMPKIN CONNETICUT FIELD</b>	This a large 25-30 pound pumpkin. The standard for the traditional Jack-O-Lantern. Orange smooth skin with shallow ribs. Great for carving, and baking into a pie. Pumpkins love sun, and are easy to grow.
<b>PUMPKIN DILL'S ATLANTIC GIANT</b>	This variety hold Worlds Record for largest pumpkin. Can grow up to 600 lbs. or more. Needs fertile soil. Plant in sunny location.
<b>PUMPKIN HAPPY JACK</b>	Grow your own Halloween Jack o Lanterns ! This beautiful dark orange pumpkin will have a good, strong handle and be perfect for carving up into your favorite scary face. Each pumpkin will weigh about 15 - 25 pounds. A fun and easy way to get every kid in your house into the garden !
<b>PUMPKIN JARRAHDAL BLUE</b>	Dazzling and unique this pumpkin has silvery blue deeply ribbed skin. Great fall decoration, but it also has very good flavor for cooking. The rich golden flesh has a mild nutty flavor. They are easy to grow and the pumpkins can get 6-12 pounds.
<b>PUMPKIN RED WARTY THING</b>	The name gives it all away. This pumpkin makes a creepy decoration its warty skin, but can also be good eating too! Nice round shape and the pumpkins can get to 20 pounds. Very fun pumpkin to grow for your kids.
<b>PUMPKIN SPOOKIE</b>	6-10 pound pumpkin with smooth red-orange skin. Sweet yellow/orange flesh. Great for pie making!
<b>RADICCHIO CHIOGGA RED PRECO</b>	Cool season vegetable. Beautiful red oval leaves are good in salads and as a garnish. Prefer well drained soil, and sunny location.
<b>SOYBEANS ENVY "EDAMAME"</b>	Good for short growing season. Plants grow to 2' with a good yield of bright green pods. Ripe when beans are plump in pod. Good for shelling or drying.
<b>SPINACH BLOOMSDALE</b>	Extra early, heavy yielding plants with large glossy leaves. Slow to bolt.
<b>SQUASH EIGHT BALL ZUCCHINI</b>	No one will believe you when you tell them this cute little squash is a zucchini. The super dark green round shape makes them look like a little ball. They are best when picked around 3-4" in diameter, and usually ripen in the hot summer months. Plants are very prolific and will be covered in an abundance of high quality squash.
<b>SQUASH FLYING SAUCER</b>	Flying Saucer is a summer squash with a fun alien shape. Squashes are star shaped with deep ribbing and are a fun mix of dark green and yellow. Tasty nutty flavor, and can be cooked in a variety of ways..steamed, sautéed, broiled etc. Plants are prolific and do very well in the hot summer months.

<b>SQUASH ROMANESCO</b>	Italian zucchini. Beautiful dark green cylindrical squash with a tender sweet taste. Best when picked at 6"-7". Plant in full sun.
<b>SQUASH RONDE DE ITALIA</b>	Round Italian heirloom. Jade colored zucchini produce over a long period. Harvest fruit from golf ball to baseball size. Sublime grilled or try them stuffed. Unique in the garden and wonderful in cuisine.
<b>SQUASH SCALLOP BENNING'S GREEN TINT</b>	A tender and tasty 2-3" scallop squash with light green skin. These plants are heavy producers and should be planted in a sunny location.
<b>SQUASH SUMMER CROOKNECK</b>	This squash produces 8-10" bright yellow fruit with curved necks. Great flavor and hardy vigorous plants. Plant in full sun.
<b>SQUASH ZUCCA DE LUNGO VERDE</b>	Try this Italian selection with very dark green, cylindrical fruit that are approximately 8 inches long.
<b>SQUASH ZUCCHINI DK. GREEN</b>	A very prolific bearing plant that will give you 10 to 12 inch fruit at maturity or try harvesting when they are only 2 inches long for the most tender Zucchini that you will ever eat - quick steamed baby vegetables can't be beat ! Find this new style of squash on your grocery store shelves and at every good restaurant.
<b>SQUASH ZUCCHINI GOLDEN</b>	Bush plant with bright golden cylindrical fruit. Excellent flavor. 55 days to mature.
<b>SQUASH WINTER DELICATA</b>	One of the best winter squashes. Also known as sweet potato squash because the bright yellow flesh has a distinct sweet potato flavor. Very pretty squash with light green to yellow skin and dark green stripes. Squashes are oblong and can get 5-10" long. The skin is thin and edible. These squashes are good baked or steamed.
<b>SQUASH WINTER MARINA DE CHIOGGIA</b>	This is a great winter squash! The skin is a silvery blue with bumps and lumps making it look more like a gourd than an edible squash. However, it has a great sweet nutty flavor with deep orange flesh. The hard bumpy skin allows it to store well and can be kept in a cool spot for a couple months after harvest. Squashes can get 10-12 pounds, and could feed a large family! You must try this rare Italian heirloom.
<b>SQUASH WINTER TABLE QUEEN</b>	Table Queen is a dark green acorn shaped winter squash. Squashes are usually small 6" in diameter, but the plants are usually very prolific. The yellowish orange flesh is yummy and sweet. Can store well, and is usually baked or steamed when cooked.
<b>SQUASH WINTER VEGETABLE SPAGHETTI</b>	Are you a "carb counter". If so this squash is for you! This is a great substitute for pasta. The creamy flesh resembles pasta and tastes great with cheese or sauce. Squashes are pale yellow and cylindrical weighing 2-3 pounds. Very tasty!
<b>SWISS CHARD BRIGHT LIGHTS</b>	1998 All American Winner. A rainbow of stem colors with green to bronze green leaves. Very tender and mild tasting chard.
<b>TATSOI</b>	Asian greens. Dark green spoon shaped leaves form a perfect thick rosette. Do very well in winter gardens, and can stand up to cold winter nights. These greens have subtle and unique taste. Great raw and used in salad greens.
<b>TOMATILLO TOMA VERDE</b>	Bushy spreading plant, easy to grow and prolific. Green fruits are the size of small tomatoes and are encased in a papery husk which splits open when mature. Sweet tangy flavor used in Mexican green salsa and other South Western dishes. 75 days to mature.
<b>TOMATO ABE LINCOLN</b>	Delicious old time flavor with the uniformity and disease resistance of the new hybrids. The male parent is an heirloom with a strong growing habit and the female parent provides you with earlier maturity – just 75 days from transplant. Delicious bright red, globe shaped fruit can grow to 1 Lb each. Very disease resistant. 75 Days Indeterminate
<b>TOMATO ACE</b>	An ideal tomato with perfect tomato taste low acid. Tomatoes are large 5-6" deep red color. Prolific plants in full sun.
<b>TOMATO ANNA RUSSIAN</b>	Exquisite large heart shaped, deep velvety pink, sweet and creamy fruit. An excellent, gorgeous tomato ! Superb rich old fashioned tomatoey flavors, and the fruits normally weighs 1 LB. An heirloom oxheart variety handed down from a Russian immigrant. Early maturing plant with beautiful lacey foliage. Excellent trellised on a metal fence. 70 Days Indeterminate

<b>TOMATO ARKANSAS TRAVELER</b>	An heirloom that traveled from the Ozark Mountains of Missouri and Arkansas. An excellent tomato which gives you nice medium sized fruits about 6 ounces in size. You will love it's creamy texture, rosy-red color and lovely flavor. You will also be pleased with how easy it is to grow anywhere in your garden. Good for hot summer areas. 90 Days Indeterminate
<b>TOMATO AUNT RUBY'S GERMAN GREEN</b>	Get ready for outrageous flavor with a slightly spicy afterglow ! Tangy, sweet, intricate, earthy, unforgettable flavor. You are going to love this tomato. The pink blushed interior is a surprise to the gorgeous light green, pleated exterior. A vigorous plant that rewards you with a big crop of 1 LB. fruits. Handed down from Aunt Ruby Arnold of Greenville TN. Good in cooler climates too. 75 – 80 Days Indeterminate Bragger Size
<b>TOMATO BANANA LEGGS</b>	Kids will love these brilliant yellow 4" mini banana tomatoes hanging on their vines ! An abundant producer of fruit throughout your whole summer growing season. Very tasty to eat right in the garden and you will also love them in salads. A fun way to get kids to eat healthy and learn about gardening at the same time ! 75 Days Determinate
<b>TOMATO BETTER BOY</b>	One of the most popular hybrids. Huge, delicious, deep red fruits, many 1 LB. each. Extremely flavorful with brilliant scarlet skin and flesh that's juicy yet firm. This variety holds the Guinness record for the most fruit from one plant – 342 pounds ! Excellent disease resistance and heavy leaf coverage to protect fruit from sunburn. Highly adaptable, and thrives in nearly any climate. 75 Days Indeterminate
<b>TOMATO BIG BEEF</b>	73 days. AAS Winner. Extra large, very meaty tomatoes can easily weigh 10-12 ounces. Bred to yield large quantities of attractive, extra-smooth fruit. Indeterminate.
